

Charm of Townsquare Park

Welcome to Townsquare Park, a European-inspired oasis right in the heart of Gamuda Cove! This park serves as a living laboratory, demonstrating the benefits of biodiversity and fostering a deeper appreciation for nature's intricate interconnection while capturing the charm of a pedestrian-friendly lifestyle.

Demonstrating a significant milestone in sustainable landscape design, Townsquare Park showcases flora species with conservation value and supports local biodiversity.

Newsletter

A Green Landmark

In keeping with Gamuda Cove's nature sanctuary theme, the 6-acre Townsquare Park is seamlessly connected to Gamuda Cove's first commercial hub, Townsquare, and SplashMania Waterpark.

With the completion of Townsquare Park, Gamuda Parks has successfully developed over 1,600 acres of green and waterscapes across 12 urban forest clusters and is on track to meet the 2,000-acre target by 2025.

Adding to Townsquare Park's allure is the L'OCCITANE Garden, a botanical concept cultivated with herbs like mint and rosemary, key ingredients in L'OCCITANE's products.

Green Gateway and permeable pathways

Walking through Green Gateway, the lush greenery lining its pathways stands out as a prominent feature of Townsquare Park. This is complemented by native and naturalized trees cultivated at Gamuda Land's Advanced Tree Planting nurseries, which minimize the need for water, fertilizers, and pesticides while boosting biodiversity.

Green gateway with permeable path

A placemaking approach transforming the green gateway into a bustling bazaar.

Walkability

Townsquare Park promotes bikeability and walkability, encouraging visitors to explore its attractions on foot or by bicycle, inspired by the pedestrian-friendly lifestyle.

Pollinator garden

Townsquare Park features pollinator gardens, pivotal in bolstering local biodiversity. The park's carefully curated flora species and arrangement attracts pollinators, including bees, butterflies, and birds, essential for the reproduction of many plants and the overall health of ecosystems.

Elements of Pollination

Pollination garden

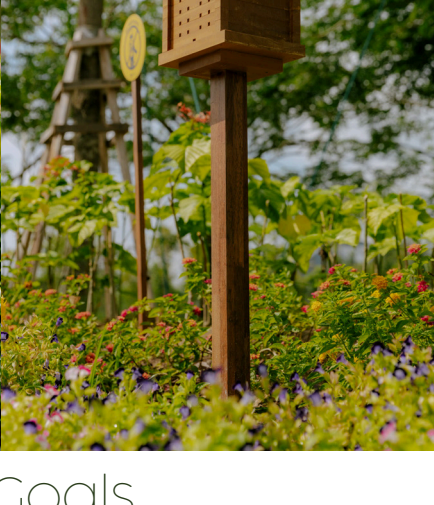

Native and flowering plant species populate the gardens, offering abundant nectar and pollen sources. These plants not only sustain pollinators but also create a visually appealing landscape.

Bee House

Strategically placed bee houses offer nesting sites for the stingless bees. These structures support local bee populations, which are essential for the pollination of a diverse array of plants.

Picnic in the park

Visitors can enjoy picnics, surrounded by a vibrant array of plants in various colors and species. This activity complements the park's role as a sanctuary for both insects and people.

Conservation Goals

- Create habitat for wildlife
- Safeguard natural resources
- Ensure the survival of rare & endangered species
- Enhance soil health
- Promote ecological balance

International day for Biological Diversity

The launch of Townsquare Park, celebrated alongside Gamuda Land's 6th International Biodiversity Day, embraces the theme "Harmony in Diversity: Connecting People with Nature."

This theme not only underscores the importance of protecting and nurturing biodiversity but also celebrates our journey in the biodiversity movement. Since we began our biodiversity audits across Gamuda Land townships, we have documented a remarkable variety of flora and fauna species, highlighting the biodiversity within Gamuda Cove to preserve and enhance.

Fountain Plaza

At the heart of Townsquare Park lies the fountain plaza, offering a contemporary twist on classical French fountains.

Winners of Art Jamming Competition, participated by university students.

Festival highlights

Among the festival's activities during International Day of Biological Diversity were outdoor yoga sessions, bicycling workshops, kombucha and clay making classes, a pop-up zoo, horse riding, the vibrant Ping Ming bazaar, panel discussion on man-wildlife coexistence, art jamming and many more.

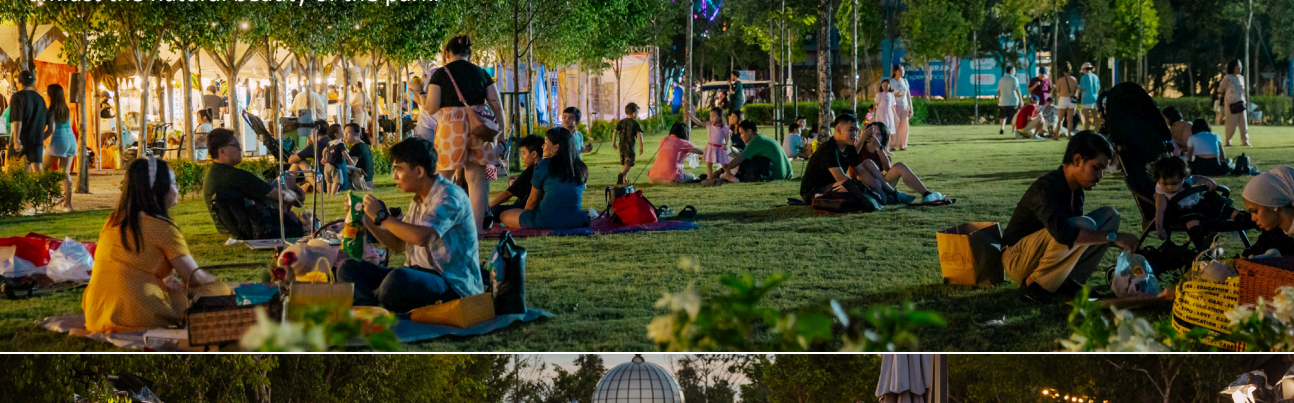

Outdoor Yoga

Yoga sessions held offering participants the opportunity to harmonize body and mind while connecting with nature.

Picnic at the park

Families and friends enjoyed a leisurely picnic amidst the natural beauty of the park.

Live performances

Live performances during International Day of Biological Diversity serve as a placemaking at Townsquare Park. These activations create a vibrant atmosphere, enriching the visitor experience.
